

Combined Technologies of CoorsTek and former Covalent Materials Featured at SEMICON Japan

Custom engineered ceramic components support advanced semiconductor processing

Tokyo, Japan and Golden, Colorado USA, December 14, 2015 CoorsTek, the world's largest engineered ceramics manufacturer, will exhibit its complete line of semiconductor processing components at SEMICON Japan from December 16-18 in Tokyo. For the first time at this event, the integrated capabilities of CoorsTek and Covalent Materials (formerly Toshiba Ceramics, now CoorsTek KK) will be on display. CoorsTek acquired Covalent Materials in December 2014, shortly after last year's exhibition.

CoorsTek will be featuring high-purity ceramic materials and durable chamber-critical components including:

- Exceptionally pure semiconductor-grade ceramics such as PureSiC™ CVD Silicon Carbide, PlasmaPure-UC™ Alumina, and StatSafe™ ESD-Safe Ceramics
- Aluminum Nitride, Graphite, Quartz, Yttria and other advanced materials
- Custom engineered components for RTP, epi, etch, implant, and other critical processes

The semiconductor industry is a key market to CoorsTek, where the company is among the largest, most experienced, and trusted partners to semiconductor processing OEMs. "As semiconductor fabs continue to move to advanced nodes, the need for intrinsic purity and process cleanliness becomes even more critical," explains Jonathan Coors, CEO of CoorsTek Semiconductor and Medical Group. "The addition of sophisticated CoorsTek KK technologies over the past year means we continue to develop new ways to help our customers achieve higher yields, less downtime, and faster throughput."

About CoorsTek

CoorsTek makes the world measurably better as the partner of choice for technology and manufacturing companies worldwide whose success requires the unique, high-performance properties of products manufactured from engineered ceramics and advanced materials. CoorsTek products and components touch people's lives through amazing solutions to global challenges in energy, transportation, information technology, healthcare, and defense, among others. For more information about CoorsTek, including product information, its history since 1910, and locations throughout Europe, North America, South America, and Asia, visit coorstek.com.
